

COENCO System®

A New Basic Principle for the Improvement of All Aspects of HVAC

types of installations

- food processing plants
- ware houses
- distribution centers
- manufacturing plants light// heavy
- air plane hangers / maintenance centers
- data centers
- telemarketing centers

people places

- airports
- arenas
- atriums
- airport terminals
- school rooms
- swimming pools
- industrial rentals / construction

some major customers

- wal-mart
- tyson
- jb hunt
- armour eckridge
- cargill
- conagra
- butterball
- sara lee
- superior wheel
- university of arkansas fayetteville , fort smith

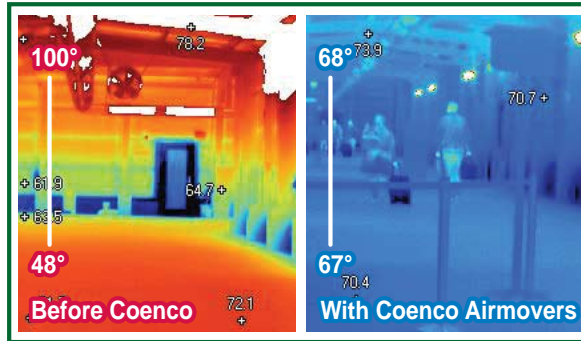

Come to us with your Energy and Other Problems...

and we will work with you for a real solution. Generally saving from 50% to 75% or more energy. In a lot of circumstances ideal conditions year round with insignificant energy cost.

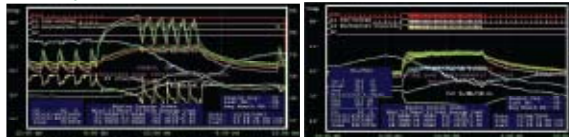

The difference is obvious the COENCO System® is far more efficient.

Facts, Results and Proof

Infra Red Thermography Color Denotes Temperature Differences Versus Uniformity

Data Logger 38 Facts Precisely Recorded Every 30 Seconds Outside And Inside

Without Coenco

Stratification (hot ceiling cold floor and no real control). No Temperature Uniformity, No Comfort and a lot Of Wasted Energy Heating The Ceiling

With Coenco

No Stratification, Uniform Temperature, Precise Control, Desired Comfort, and Many Other Advantages Never Seen Before

Energy...

...is the crisis of our time.

COENCO HAS THE ONLY REAL SOLUTION.
Greatly improved results with a lot less energy and equipment.

30 Years of Original, Independent, Privately Funded, Result Oriented R & D

30 years of independent, privately funded result oriented research and development has brought new facts, opportunities and improvements never thought possible.

Retrofitting existing buildings is our focus!

Clarion Inn

"What a great improvement - Comfortable Winter and Summer with 85 % less utility cost !! Our old HVAC equipment has lasted 8 extra years because it is simply is not running as much."

-Bill Clodfelter Owner

Reduced
Energy and HVAC
Equipment
(50 - 70%+)

Desired

Conditions
and / or
Comfort

Provide New Opportunities to Reduce
Energy Use to Insignificance
(Process or Acclimation)

Noodles Restaurant

"At our old location, we had 7,500 square feet of space and 47 tons of air conditioning. During the heat of the summer our interior airspace would reach as high as 80 degrees during our peak sales periods

The new building has 8,700 square feet, an increase of 1,200 square feet. Our project mechanical engineer designed a system with 50 tons of A/C with traditional duct work design through out the restaurant. Working with you, we completely redesigned the system and cut our tonnage from 50 to 33 and dropped about 70% of the duct work and replaced it with 7 COENCO fans.

This has worked out to be the perfect amount. Even when the temperature exceeds 100 degrees and we have a full house of customers (250), our room temperature is about 73 degrees and **everyone is comfortable!**"

-Kirby Walker

Greenland Public Schools

"Traditionally, our gym has been stuffy and hot during basketball games. After the installation of Coenco's system, we have **fresh air** in our gym and the CO2 level is now under control."

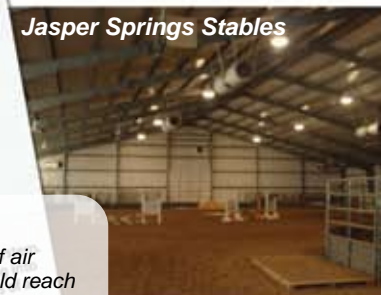

Sincerely,

Kirby Walker

-Scott Harris

All-Star Sports Arena

"Just not possible without your significant economic benefits of reduced energy and equipment costs."

ConAgra Foods food processing

"The Air Movers provide a noticeable air movement; the air circulation has resulted in stable room temperatures, and has created a drying effect on the walls, ceilings and floors."

-Steve Ardiana

Coenco is Dedicated to Improved Energy, Process and Comfort Solution Technology for Today's Demands!
