Fayetteville, AR 72704

Gentlemen:

Your efforts and contributions to the success of my business, ALL STAR SPORTS ATHLETIC ARENA, a 125,000 sq. ft. athletic facility, is greatly appreciated.

My facility consists of:

- 2 regulation soccer fields
- 10 basketball courts
- 10 volley ball courts
- 15,000 sq. ft. exercise area
- room for up to 7-10,000 spectators

The overall results are testimony to your sincere and dedicated efforts to give the businessman and community a viable and sorely-needed, healthy answer for our youngsters in today's difficult business and economic climate.

The best words to describe your inputs to my project are, "**JUST NOT POSSIBLE WITHOUT YOUR SIGNIFICANT ECONOMIC BENEFITS OF REDUCED ENERGY AND EQUIPMENT COSTS.**"

Summer results are: effective, comfortable cooling on 90+ degree days with 40 tons of AC with your system vs. 300 tons of the traditionally, recommended equipment. Winter statistics show the desired 70-72 degrees for a gas cost of between \$2,500 and \$3,000 per month instead of in excess of \$12,000 per month. This was possible even with the fact that our gas cost this past winter was up 47% and we have a few structural modifications to make for the building to be more efficient.

My banker and my family recognize our project would just not be possible without the Coenco System.

Sincerely,

Scott Harris
